

# **scRNAseq Analysis of Dengue Samples**

Anoop Ambikan

2025-06-18

## **Table of contents**

# 1 Project Summary

The project aim to investigate the DENV mediated host metabolic re-programming at cellular level and at the resolution of metabolic reactions.

## 1.1 Experiment Design

The project has 10 infected samples and 10 control samples. scRNAseq data was generated from each of the samples with 10000 cells per samples.

## **2 Introduction**

This is the overview.

### **2.1 Analysis**

This is the analysis section. It will show up as 2.1 in the sidebar.

### **2.2 Processing**

This is the processing section. It will show up as 2.2 in the sidebar.

## 3 Summary

In summary, this book has no content whatsoever.
